Personal statement

Experienced in managing staff and evaluating the strength of individuals to ensure that the team work effectively and efficiently. My passion is science and technology. I subscribe to news feeds keeping me up to date with the latest developments in technology and scientific theory.

People describe me as optimistic, I always believe things can be improved or run more efficiently. I work well in a team where I can put forward my ideas and explain the benefits whilst also listening to others and debating possible development or improvements. I welcome constructive feedback on my own ideas.

I hope to be part of the developing web community, working with the latest technology and researching better ways including up and coming techniques and methods.
